FIELD NOTE	No. 1
At a glance. This is the pedagogy module: how to teach online safety so that it sticks. You'll learn the five rules of safety teaching that works, see "good versus weak" lesson examples side by side, practice shame-free language, plan a spiral across the year, and add games, songs and movement. Quick Start learners: read the five rules and the "Good vs weak" table, and skip the rest for now.	

Learning objectives

BY THE END OF this module you will be able to:

1. State the five rules of safety teaching that works and give an example of each.
2. Tell a good lesson from a weak one, and rewrite a weak one.
3. Use shame-free language and avoid fear appeals.
4. Design a role-play for any skill.
5. Explain how a spiral curriculum works across grades K-12 and across a single school year, so that nothing taught in September has to be re-explained from scratch in May.
6. Add games, songs and movement that serve the learning goal.

Welcome: the CPR lesson

NOBODY LEARNS CPR FROM a lecture on cardiac arrest. They kneel on the floor, push on a plastic torso to the rhythm of "Stayin' Alive," and practice until their hands know what to do. When the real moment comes, people don't rise to the occasion. They fall to the level of their practice.

That is the whole of this module. A child being pressured online at 9:40 on a Tuesday night will not recall a slide. She might recall a phrase she practiced, a hand signal she did with a giggle, or the face of a teacher who said "you will never be in trouble for telling me." So for any lesson, ask: **What will the child be able to DO afterwards, and have they practiced doing it?**

Part 1: The five rules of safety teaching that works

THESE RULES DRAW ON prevention science (see Module 1). Where evidence is adjacent rather than direct, we say so. [VERIFY specifics when citing publicly]

RULE 1: SKILLS OVER INFORMATION

Information tells a child what is true. A skill is something they can do. Good safety lessons teach a small number of facts and a concrete skill to practice.

INFORMATION (NECESSARY BUT NOT ENOUGH)	SKILL (WHAT MAKES THE DIFFERENCE)
"Scammers pretend to be someone you know."	"Check another way: call or ask a trusted adult before you click or pay."
"Don't share personal information."	"When someone asks for a password, say 'No, I'll check with my grown-up.'"
"Cyberbullying is harmful."	"Be an upstander: check in privately, say 'not cool,' save the evidence, tell an adult."
"Pictures you share can be misused."	"If someone threatens you, STOP, SAVE, TELL, REPORT."

SAVE means keep the messages, usernames and dates; it never means saving or sharing images (see Module 6).

Teacher test: for every lesson, finish the sentence "After this, students can ____ (a verb they can show)."

RULE 2: REHEARSE IT, OUT LOUD, WITH YOUR BODY

Children learn skills by practicing them, ideally several times and in different ways. In Hackles, practice includes role-play, scripts, hand signals ("Hackles Up," Pause Palm, Check Eyes, Tell Wave), card sorts, short games and partner scripts. The research on school-based abuse prevention, which has been better studied than online safety, finds that active skill practice is better supported than lecture. [VERIFY, Finkelhor et al., 2021, and related reviews]

Why role-play works: it makes the words available when the real moment comes. A child who has said "I need help" ten times in a silly voice can say it once in a hard moment.

Teaching tips:

- Keep role-plays short (1 to 3 minutes), scripted at first, and never with real personal details.
- Use **puppets, stuffed animals or character cards** for younger children, so no child plays the "bad guy."
- Use **"the adult plays the difficult person"** with a clear signal, such as a hat, for when you step out of character.
- Let students play the **helper**, not the victim.

RULE 3: CALM, HOPEFUL, NO FEAR APPEALS

A **fear appeal** is a message that tries to change behavior by frightening people ("Predators are everywhere!"). The general research on fear appeals is mixed, and they tend to work only when people also feel there is something they can effectively do. There is limited direct evidence on online safety. [VERIFY before saying fear appeals are proven to backfire in this field.] What we do know from practice: scary stories raise anxiety in some children, make others tune out, and can make the later act of telling feel riskier.

Replace the threat with the **tool**:

FEAR FRAMING	HACKLES FRAMING
"If you talk to a stranger, something terrible could happen."	"If anyone asks for secrets or pictures, your hackles go up. Pause and tell."
"You will be hacked!"	"Two locks are better than one."
"Your life will be ruined."	"If a mistake happens, we fix it together. Telling is always okay."

RULE 4: SHAME-FREE LANGUAGE, EVERY TIME

Shame is the biggest obstacle to help-seeking. So the **words** matter. Hackles language promises three things:

1. **A false alarm is fine and welcome.**
2. **It is never your fault.**
3. **You will not be in trouble for telling.**

Say them out loud often. Children need to hear them many times, especially older ones, who assume the opposite.

Language to use and avoid

AVOID	USE INSTEAD
"Don't be silly, it's obvious."	"These tricks are designed to fool everyone."
"You should have known better."	"I am glad you told me. Let's figure out next steps."
"Why did you click it?"	"What happened next?"
"Be careful, or else."	"If something feels off, here is what to do."
"Good kids don't do that."	"Lots of people make mistakes. What matters is what we do next."
"Victim" (to a child)	"The person it happened to" or just "you."
"Predator," "stranger danger"	"Someone who is pressuring you" or "someone you do not know well."
"Stupid," "dumb," "naive"	Never.

A subtle one: "never" language. "Never share your name!" invites failure, because children inevitably do. Prefer "think first," "ask a trusted adult," "check first."

RULE 5: SPIRAL, REPEAT, AND CONNECT

One lesson does not do it. Skills need to be revisited, a little deeper each time, over months and years. That is the idea of a **spiral curriculum**.

The Hackles spiral. Each grade band returns to the same core routine (Hackles up? Pause, Check, Tell), and the same strands (locking accounts, spotting tricks, protecting privacy, handling pressure, being kind, getting help), at a more advanced level.

STRAND	K-2	3-5	6-8	9-12
Tell / get help	"My Tell-Someone Team"	"The Help Ladder"	"Help Ladder: Real Practice"	"Be the Helper"
Passwords and accounts	"Secret Passwords"	"Passphrase Lab"	"Account Defense"	"Credentials and Passkeys"
Pressure and grooming	"Online Friends vs. Real Friends"	"Game Chat Red Flags"	"Grooming Patterns," "Pressure Online"	"Coercion in Relationships Online," "Sextortion and Image Abuse"

Three of the eight strands, as examples. The Teacher Guides carry them all.

In a school year. Teach one 15-minute lesson a week for ten weeks, then revisit key skills with 3-minute "warm-ups" in the following months ("Hackles check-ins").

Connect to your curriculum. Weave the routine into ELA (evaluating sources), math (password combinations), science, social studies and advisory. A skill practiced in four classes is practiced four times.

Part 2: "Good vs weak" lesson examples

HERE ARE THREE PAIRS of lessons on the same topic. Notice what separates them: not budget or gadgets, but **what students do**.

PAIR 1: PASSWORDS (GRADE 4)

	WEAK LESSON	GOOD LESSON
Format	Teacher shows a slide on "10 password rules" and reads each one.	Students compete in small groups to build the funniest 4-word passphrase, then use a "crack timer" card to see how long it would take to guess.
What students do	Listen. Copy rules.	Create, compare, discuss, decide.
Tone	"If you use a bad password you could lose everything."	"Silly and long beats short and clever."
Ending	Quiz on the rules.	Exit ticket: "Tell a partner your new rule for passwords. When do you tell a grown-up?"
Why it works		Active, memorable, skill plus reason, calm.

PAIR 2: TELLING AN ADULT (GRADE 1)

	WEAK LESSON	GOOD LESSON
Format	"If anyone ever makes you feel uncomfortable, tell a trusted adult." (Said once.)	Children trace a hand, name three trusted adults on three fingers, practice saying "I need help" to a partner, and practice what to do if the first adult is too busy ("keep telling").
What students do	Nod.	Draw, speak, rehearse.
Why it works		Names real people. Rehearses the words. Builds "keep telling."

PAIR 3: SENSITIVE TOPIC: PRESSURE ONLINE (GRADE 8)

	WEAK LESSON	GOOD LESSON
Format	Graphic stories about what happens to children who share pictures.	Calm case files about a fictional character; students identify the pattern (flattery, secrecy, the move, the ask), rehearse STOP, SAVE, TELL, REPORT, and name a trusted adult.
Tone	"Don't send pictures or you will regret it."	"If someone threatens you, it is never your fault. Here is what you do."
Risk	Shame, fear, silence.	Shame-free, hopeful, a path.
Why it works		No graphic detail. Skill. Help-seeking.

THE "GOOD LESSON" CHECKLIST

A good Hackles lesson:

- ☐ Has one clear **skill** students will practice.
- ☐ Includes a **rehearsal**, not only a discussion.
- ☐ Uses **no fear, no shame, no graphic detail**.
- ☐ Gives students a **role** other than "victim."
- ☐ Ends with **who to tell** and **"you are never in trouble for telling."**

- ☐ Takes about **15 minutes** and is **repeatable**.
- ☐ Includes a way to **check** what students learned (exit ticket, thumbs, a sort).
- ☐ Offers a **way for a child to disclose** safely, and the teacher is **ready** for it.

Part 3: Age-appropriate by band

BAND	WHAT IT SOUNDS LIKE	WHAT TO AVOID
K-2 (5 to 7)	Concrete, physical, silly. Puppets, hand signals, chants. One idea per lesson. "I need help."	Abstract rules, internet jargon, detail about harm.
3-5 (8 to 10)	Labs, detective roles, games, cards. Structured group work. Introduces reasons ("why").	Fear stories, long lectures, shaming.
6-8 (11 to 13)	Case Files, analyst roles, peer dynamics, real-world patterns. Respect for their expertise.	Talking down; acting as if they know nothing.
9-12 (14 to 18)	Threat modeling, ethics, autonomy, relationships, careers. Adult tone, plain language.	Lecturing; moralizing; hypocrisy.

HACKLES' HACKLE MASCOT APPEARS in K-5 materials and only as a small corner icon from grade 6 on. Teens do not want a cartoon talking to them, and they will notice if you do not respect that.

Part 4: Fun is not a luxury

TEACHERS SOMETIMES WORRY THAT games and songs make the topic seem unserious. The opposite is true: fun is what makes a topic **repeatable**, and repetition is what makes it stick. The rule is simple: **play with the skill, never with the harm**. We make games about spotting a fake message, never about a victim's experience.

GAMES THAT WORK (ALL UNPLUGGED, ALL INVENTED HERE FOR YOU TO ADAPT)

GAME	HOW IT WORKS	SKILL
Phish or Real? Show Me	Fake messages on cards. Students hold up a green card (Real) or red card (Phish) after discussing with a partner.	Check
Hackles Up Freeze	Teacher reads short situations. If hackles should go up, students freeze in the Hackles Up pose (hand up the back of the neck). If not, they keep walking.	Noticing
The Pause Palm Statue	Students walk around the room; on "pop-up!" they freeze with a Pause Palm. Then discuss what they would check.	Pause
Tell Chain	In a line, each student says a different helper they could tell. Nobody can repeat.	Tell
Silly Passphrase Builder	Teams draw four random word cards and create a silly picture of them.	Passwords
Two Truths and a Scam	Students write three messages, two real, one fake. Others spot the scam.	Check
Upstander Line	Students line up on a "Doing nothing - Doing something small - Doing something big" spectrum for sample scenarios and discuss.	Kindness

SONGS AND CHANTS (ORIGINAL, FREE TO USE)

Songs help young children memorize a routine. Keep them short. Here are two original ones for you to adapt.

The Hackles Chant (to a clapping beat; K-3)

FIELD NOTE	No. 2
Hackles up! (hand up the back of the neck) Something's funny, something's weird! Pause! (palm out) Don't click yet, we'll be steered! Check! (point eyes with two fingers) Who is this and what's the ask? Tell! (hand on heart, reach out) A grown-up's help is not a task!	

The Passphrase Song (to the tune of "Twinkle, Twinkle, Little Star"; K-3)

FIELD NOTE	No. 3
Four silly words are strong and long, Put them in a crazy song. Keep them secret, keep them mine, Share them with a grown-up kind. Four silly words are strong and long, Now you know it, sing along!	

Older students? Skip the songs, unless it is ironic. Use a **chant, a rhythm or a catchphrase** instead: "Pause. Check. Tell." works. For teens, a one-line "rule of thumb" delivered with a straight face is the equivalent.

MOVEMENT

- **Four corners:** Label corners "Hackles up," "Not sure," "Probably fine," "Tell someone." Students walk to a corner for each scenario.
- **Human spectrum:** Line students up between two signs ("I would pause" and "I would ask for help") using invented scenarios. Let students pass, and never ask anyone to explain a personal choice.
- **Stretch and breath:** End sensitive lessons with a calm ritual (a deep breath, a shake-out, a stretch) so children leave regulated.

ONE CAUTION ABOUT "GAMIFICATION"

Avoid competitive games that let children **lose** in front of peers on sensitive content, and games that reward children for **disclosing** information. Collaboration (teams, class totals) usually works better than leaderboards.

Part 5: A lesson design recipe

1. **Pick the skill** (one verb) and **the signal** that should make hackles go up.
2. **Hook** (2 minutes): a warm story, riddle or question, never scary.
3. **Rehearsal** (8 minutes): a game, role-play, card sort or script.
4. **Takeaway** (2 minutes): one sentence and one gesture, with "never your fault" and "tell."
5. **Check:** an exit ticket or thumbs. Did it land?

MODULE 5 TURNS THIS into the full 15-minute structure.

Do it yourself

ACTIVITY 4.1: FIX THE FEAR LESSON (15 MINUTES)

You need: paper or a document.

Below is a weak lesson plan. Rewrite it as a good lesson using the five rules.

FIELD NOTE

No. 4

Weak lesson: "Internet Safety Assembly" (Grade 5, 30 minutes). The teacher shows a PowerPoint with 20 slides. Slide 1: "Predators are online!" Slides 2 to 10: lists of rules (never share your name, never talk to strangers, never post pictures, never meet anyone). Slide 11: a news story about a child who was harmed. Slides 12 to 20: more rules. The teacher ends with "Any questions?" Nobody asks. The teacher says "good, because you know the rules now."

Your rewrite should include: (1) one skill, (2) a short hook without fear, (3) an 8-minute rehearsal, (4) a takeaway with "never your fault" and "tell," (5) a check.

Sample rewrite. Skill: "Say 'I'll check with my grown-up' and tell when someone online asks for something." Hook (2 min): a short story about Hackle noticing a "free coins" pop-up. Rehearsal (8 min): partner role-play with a card that says "Free coins! Give me your password." Partner A practices Pause Palm and the words, Partner B plays the pop-up with a silly voice, then swap. Discuss (3 min): "How did your body feel? What is a safe thing to do?" Takeaway (2 min): "When my hackles go up: Pause. Check. Tell. It is never my fault, and a false alarm is fine." Check: exit ticket, "Write or draw one grown-up you would tell."

ACTIVITY 4.2: SHAME-FREE TRANSLATOR (10 MINUTES)

Translate each shaming sentence into a shame-free one.

SHAMING SENTENCE	YOUR SHAME-FREE VERSION
"How could you click that link?"	
"I told you this would happen."	
"You are old enough to know better."	
"Now your account is gone, are you happy?"	
"Don't be dramatic, it is only a message."	
"That is what you get for talking to strangers."	

Sample answers. "Thank you for telling me. Let's check what happened." / "I am glad you came to me. Let's fix it." / "These tricks fool grown-ups, too. What happened next?" / "We can get your account back, and we will make it stronger." / "Tell me more. It sounds like it upset you." / "You did the right thing by telling me. The person who sent that did something wrong."

Say each one out loud, in your calmest voice. How would your face look? Your face matters as much as your words.

ACTIVITY 4.3: DESIGN A REHEARSAL (15 MINUTES)

Choose a skill from the list and design a 3-minute rehearsal for it, with an age band in mind.

- Say no to a request for a password.
- Leave a group chat that feels unkind.
- Tell an adult when the first one is too busy.
- Move away from a request to switch apps.
- Block and report an account.

Fill in the plan:

ELEMENT	YOUR PLAN
Skill (verb)	
Age band	
Setup (what do students need?)	
The script (what do they say or do?)	
Who plays the "difficult" part? (Hint: teacher, puppet, card)	
How do we end safely and calmly?	
How do I know it worked?	

Specialist Challenge: Take a technical lab you already teach (for example, a packet capture or a phishing analysis) and add one 3-minute rehearsal of the human skill that goes with it (for example, "what would I say to my family?").

Scenario Studio

SCENARIO 4.A: "CAN'T WE JUST SHOW A VIDEO?"

A COLLEAGUE SAYS, "I do not have time for activities. Can I just show the video from last year?" The video features dramatic reenactments of a teen being tricked and ends with a stern warning.

Discuss: What are the real constraints behind this request? What is wrong with a video as the entire lesson, and what is a 5-minute compromise?

Expert-response guidance. Acknowledge the time pressure honestly. A video can be a hook, but not the lesson. Offer a compromise: show a short clip (or none), then run a 5-minute rehearsal: partners practice the Pause and Check script. And add the three promises (false alarm fine, not your fault, no trouble for telling). Share that you are happy to co-plan. Do not disparage the colleague's effort.

SCENARIO 4.B: THE KID WHO "ALREADY KNOWS IT ALL"

In your grade 7 class, a confident student says, "This is baby stuff. Everyone knows not to click scam links." Several classmates laugh.

Discuss: What is the student's need? How do you keep the activity valuable without a power struggle, and how might you use the student's confidence?

Expert-response guidance. Honor expertise: "You may well be right, and I would love your help. Can you be our lead analyst on this case?" Give the student a role (an expert panel, a "red team" that writes the trickiest fake message). Raise the challenge: use a more subtle example, such as a message from a "friend's" hacked account. Gently reinforce: "Even experts get caught when they are tired or rushed. That is why we practice a routine and not just knowledge." Avoid the power struggle; invite, do not argue.

SCENARIO 4.C: THE GIGGLING ROLE-PLAY

During a role-play on "someone asks you to move to a private app," two students giggle and make it a joke. One says, "I would just send the pic lol." The room goes quiet.

Discussion questions

1. What are the possible meanings of "I would just send the pic"?
2. How do you respond in the moment, without humiliating anyone?
3. What follow-up is needed?

Expert-response guidance. In the moment: calm, brief, no shaming. "Thanks. Lots of people feel pressure about that. That is exactly why we practice. Let's try another response together." Redirect to the skill: practice STOP, SAVE, TELL, REPORT or the "No, I'm going to tell" script. Treat the comment as possibly meaningful: follow up privately and casually after class. "I noticed what you said. Is there anything you want to talk about?" Do not interrogate. If anything suggests a child has sent or been pressured to send images, or is being threatened, follow Module 6 and your reporting policy; do not view any image. [VERIFY your district policy] Loop in your counselor.

Reflection prompts

1. Think of the best lesson you ever sat through as a learner. What made it work, and which features can you bring to a Hackles lesson?
2. Where do you notice yourself using fear or shame, even gently? What triggers it?
3. Which game or movement would you try this month, even if it feels a bit silly?

Self-check (10 questions)

1. Which is a skill, not just information?
 - a) "Scammers use urgency."
 - b) "When someone asks for my code, I say 'No, I'll check with my grown-up.'"
 - c) "Passwords are secret."
 - d) "The internet has dangers."
2. True or false: One scary assembly is the most effective way to change behavior.
3. What best describes a fear appeal?
 - a) A hand signal
 - b) A role-play
 - c) A message that tries to change behavior by frightening people
 - d) A game
4. Which phrase is shame-free?
 - a) "How could you fall for that?"
 - b) "I'm glad you told me. These tricks fool a lot of people."
 - c) "That was silly."
 - d) "I told you so."
5. What does "spiral curriculum" mean?
 - a) Teaching only to older students
 - b) Teaching each topic once and moving on
 - c) Teaching in a circle
 - d) Revisiting the same skills at increasing depth over time
6. A good role-play for younger children often uses
 - a) A real student as the "bad guy"
 - b) Live chats with strangers
 - c) Puppets, cards or the teacher in a clearly marked role
 - d) Graphic stories
7. True or false: Games should never be used for safety topics because they trivialize the issue.
8. Which statement matches the three Hackles promises?

- a) Only report if you are sure, take blame, and keep it quiet.
- b) You must always be right, it is your job to avoid mistakes, and telling is risky.
- c) A false alarm is fine, it is never your fault, you will not be in trouble for telling.
- d) None of the above.

9. In a role-play, the best role for most students is

- a) The helper or the person practicing the skill
- b) The victim
- c) None
- d) The offender

10. At the end of any lesson, what should students hear?

- a) A warning about what happens if they do not follow the rules
- b) A list of rules
- c) Nothing
- d) Who they can tell, and "you are never in trouble for telling"

ANSWER KEY

Q	ANSWER	WHY
1	b	A skill is something a child can do.
2	False	One-offs are weak; repetition and skill practice are better supported.
3	c	A fear appeal tries to frighten people into changing behavior.
4	b	It thanks, reassures and normalizes.
5	d	Revisit and deepen.
6	c	Avoid real children as offenders.
7	False	Play with the skill, not the harm.
8	c	Those are the three promises.
9	a	Practice the helpful behavior.
10	d	Help-seeking is the central outcome.

Take Action this week

- ☐ Say the three promises aloud to a class or to your mirror: "A false alarm is fine. It is never your fault. You will not be in trouble for telling."
- ☐ Replace one shaming phrase you tend to use with a shame-free one.
- ☐ Pick one game from Part 4 and plan when you will use it.
- ☐ Teach (or practice with a friend) the four hand signals: Hackles Up, Pause Palm, Check Eyes, Tell Wave.
- ☐ Look at one lesson you teach now and check it against the "good lesson" checklist.
- ☐ Choose one "weak" activity (a lecture, a video) and add a 3-minute rehearsal.

Specialist Corner

YOUR LAB-HEAVY INSTINCTS ARE an asset. Convert one lab into a **three-part lesson**: (1) a 2-minute story that makes the stakes human, (2) the 8-minute technical activity, (3) a 3-minute "what would I say or do?" rehearsal. Don't run live demonstrations of real attacks on real services with students, and never ask students to try attacks on school systems or on each other. Teach defense, ethics and the legal line first. [VERIFY your district's acceptable-use policy and state law on computer misuse]

Where we go next

IN MODULE 5 WE put it all in a 15-minute box and you practice a real micro-teach with a rubric. You'll probably be nervous. Good. You get to feel what your students feel.

This module is educational guidance, not legal advice.

QUICK CARD

Quick Card: Module 4, Teaching Safety That Works

Five rules

1. Skills over information. Finish: "After this, students can ____."
2. Rehearse it out loud, with your body. Role-plays are 1 to 3 minutes with invented details; students play the helper; an adult or puppet plays the difficult part, with a signal for stepping out of character.
3. Calm and hopeful. Replace the threat with the tool.
4. Shame-free language, every time.
5. Spiral: repeat across weeks and years.

Three promises (say them often): A false alarm is fine and welcome. It is never your fault. You will not be in trouble for telling.

Say / avoid

SAY	AVOID
"I am glad you told me. Let's figure out next steps."	"You should have known better."
"What happened next?"	"Why did you click it?"
"These tricks are designed to fool everyone."	"Don't be silly."
"Someone who is pressuring you"	"Predator," "stranger danger"
"Think first," "check first"	"Never share your name!"

STOP, SAVE, TELL, REPORT (threats): stop replying and never pay; save messages, usernames and dates (never images); tell a trusted adult; report.

Good lesson checklist: one skill; a rehearsal; no fear, shame or graphic detail; a role other than victim; ends with who to tell; about 15 minutes; a quick check; a safe way to disclose and a teacher ready for it.

Gestures: Hackles Up, Pause Palm, Check Eyes, Tell Wave.

Games: Phish or Real card hold-up; Hackles Up Freeze; Tell Chain; Two Truths and a Scam. Play with the skill, never with the harm. No leaderboards, and no games that let a child lose in front of peers on sensitive content.

Design recipe: skill and signal; hook (2 min); rehearsal (8); takeaway (2: skill, gesture, promise); check.

Rhythm: one 15-minute lesson a week for ten weeks, then 3-minute check-ins.

Never in class: live attacks on real services, or attacks on school systems or each other.
