
Hackles Activity & Drawing Book

Coloring and Drawing

Hackles · a free kit · quillsup.org · October 2026

44 printable pages (SVG, 800 x 1000, portrait, black line with light optional color accents on white). Bundled as `../Hackles_Activity_Book.pdf` (US Letter, answer keys last) with a one-image overview in

`../Hackles_Activity_Book_contact_sheet.png`.

Core book = **36 pages in four groups** (A 10 drawing, B 14 puzzles, C 8 crafts, D 4 awards), plus a cover, one bonus passport page, and six answer-key pages. All art uses the Hackles Crew from `kit/09_Art/characters/` (drawn by the same generator code, outlines thickened for print). Art text is large and simple; no page asks for, or shows, a real password or real family code word.

Legend on craft pages: dashed line = cut, dotted line = fold.

Print: US Letter, "actual size" or "fit". Color is not needed. Crafts work best on cardstock; stickers on sticker paper or glued to card.

ANSWER KEYS (PRINT FOR THE GROWN-UP; PLACED LAST IN THE PDF)

K1 page38 word search 1 | K2 page39 word search 2 | K3 page40 all three mazes | K4 page41 crossword + secret code | K5 page42 both matching pages | K6 page43 spot-the-difference circles + Real or Pretend answers. Dot-to-dots are self-checking.

Age bands at a glance

- **Ages 5-7 (K-2):** A1-A5, A7-A10, B1, B6, B8, B10, B12, all crafts, all awards, passport. A grown-up reads the words aloud.
- **Ages 8-10/11 (3-5):** A4-A10, B2-B5, B7, B9, B11, B13, B14, all awards. Independent readers.

How these pages were made and checked

Generator: `tools/art/build_activities.py` (+ `act_lib.py`, `act_pages_{a,b,c,d,keys}.py`), re-run from the workspace root with `python tools/art/build_activities.py all`. Independent checker: `python tools/art/verify_activities.py`.

- Mazes are generated depth-first (one route only). The checker confirms every cell is reachable, the solution starts and ends at the right doors, and no step crosses a wall. Maze 3 puts Pause, Check, Tell on the solution route, so reaching them in order is guaranteed.
- Word searches are placed by code. The checker re-reads the letters printed on the finished SVG and confirms every listed word appears exactly once (all 8 directions) and is on the word list.

- Crossword: all 12 words placed; the checker confirms every horizontal and vertical letter run equals a clue answer (no accidental extra words).
- Cipher messages are generated with key 3 and decoded back by code. Dot labels 1..N are each printed once, with minimum dot spacing above 34 units.
- Spot-the-difference differences are toggled in code, and the key circles come from the same list.

Known limits (read before printing a class set)

- Crafts (puppets, pop-up, paddle, door hanger, tent, headband) are laid out carefully but have not been physically cut and folded. Test one before printing a class set. The pop-up creases follow the standard step pop-up but are untested.
- Headband: 4 strips of about 6 inches give roughly 20 to 22 inches after taping; add or drop a strip to fit.
- Real-or-Pretend pictures are simple code drawings; the dog and rainbow cat are the least polished.
- Dot-to-dot shapes are generated outlines with a pre-printed face; they read as Hackle and Latch but are simpler than the main crew art.
- Page prompts are written for a grown-up to read aloud to ages 5-7.
