
Hackles Coloring Book

Coloring and Drawing

Hackles · a free kit · quillsup.org · October 2026

50 black-line coloring pages (800x1000 SVG, white fills, 4-6px rounded outlines) plus a cover and an index page. Every page title is drawn as outlined bubble letters you can color in. Hackle is drawn per Art Style Guide v2: a baby hedgehog with soft quills, which stand up with a sparkle in the Hackles Up pose.

- **Pages 1-30 (ages 4-9):** the Crew in lesson scenes, with large characters, friendly backgrounds, patterns to color and big readable speech bubbles. Pages 29 (bookmarks) and 30 (certificate) are take-home pieces.
- **Pages 31-40 (ages 9-13):** mindful pattern and mandala pages built from strand icons and cyber motifs. A small Hackle badge sits in the lower-left corner.
- **Pages 41-50 (ages 3-5):** one huge character plus one big prop, minimal lines and very large areas, for the youngest colorers. Pages 49 and 50 are sticker-spot pages (round scalloped spots to fill with a sticker or a drawing).

Threats are always silly-cute; no real brands or people; no bodies are drawn on the body-safety page (hearts and stop-hand symbols only). The retired alias "Tell-Someone Ladder" is not used: the tool is the **Help Ladder** (page 11).

Files: `cover.svg`, `index.svg`, `page01.svg` to `page50.svg`,

`Contact_Sheet.png`. **Printable book:**

`../Hackles_Coloring_Book.pdf` (letter size, 52 pages).

Rebuild from the workspace root: `python`

`tools/art/build_coloring.py` then `python`

`tools/art/finalize_coloring.py` (**sources:** `tools/art/cb_lib.py`,

`bubble.py`, `cb_props.py`, `cb_a.py`, `cb_b.py`, `cb_c.py`, `cb_old.py`,

`cb_new.py`, `cb_front.py`). Bubble letters are converted from Arial

Black glyph outlines with fontTools (needs `pip install fonttools`),
so the SVGs contain no live text and render the same everywhere.
