Method. "Read" = I fetched the page or document and read the relevant text myself (HTML, PDF text, or a state API response). Only these support [VERIFIED] tags in States_A-M.md. Search-result pages and automated page summaries were used only as pointers. "Pointer" = seen in a search result or summary only; not read; any claim from it is [VERIFY]. Some sites (ILGA, Justia, several state pages) returned certificate or 403 errors to the summary tool; I read those directly with a command-line fetch instead, and noted where a page could not be read.

- legis.la.gov Law.aspx for R.S. 17:280: no valid document ID found; the repeal is established from the Act 686 digest instead.
- justia.com: returned 403; not used for any verified claim.
- Several secondary sites (state-policy trackers, law firm summaries, legal-aid sites) appeared in searches. They were used only to find primary pages. At least one (it described R.S. 17:280 as current) is out of date.
